

Enamel Pin Banners

MATERIALS

- Felt
- Low Temp Hot Glue Gun
- String/Yarn
- Scissors
- Wooden Dowel

DIRECTIONS

1. Measure the felt against the length of the wooden dowel. Trim felt if necessary leaving space at each end of the dowel.
2. Place a line of glue at the top of the felt. Bring the top of the felt over the dowel to create a pocket for the dowel.
3. To create the point at the bottom of the banner, lightly mark the middle on the bottom of the felt. Then put glue on one corner and fold up. Repeat process with the opposite corner. See picture for help.
4. Flip felt over so that the front is face up. Glue on any additional designs you like.
5. Attach the string by making a simple knot at both ends of the dowel.
6. Attach enamel pins and hang!
