

RFP 22MCO591

**In response refer to RFP No. 22MCO591 Response to Additional Question
August 4, 2022**

Gentlemen/Ladies:

The following question has been asked and is hereby answered:

1. What is the new number of locations? This affects materials required for the project on the Pipeline cap.
The number of proposed pipeline caps did not change. The units were changed from "each" to "linear feet" to better represent the amount of material required due to the skew of the pipeline crossings requiring caps.
