FLOODPLAIN DETERMINATION (Office Use only)

Based on the best available information, the above property IS / IS NOT located within a Special Flood Hazard Area (SFHA) (100-year floodplain) on the effective FIRM. This property IS / IS NOT located within a regulatory floodway on the effective FIRM. Development of this property must be in accordance with the conditions set forth on the attached permit in order to minimize the chances of flood damage and to meet federal and local regulations.

Zone _____ Panel _____ Effective Date ____/____/____

 Midland County Floodplain Administrator (or Assistant)

FLOODPLAIN PERMIT FOR AREAS INSIDE THE 100 - YEAR FLOODPLAIN

Permit No _____

Date _____

Property Address _____

The following restrictions apply to construction or other development at this location. Failure to comply with these regulations may result in septic system permit being withheld, great difficulty in obtaining a loan on the property, extremely high flood insurance premiums, or ineligibility for flood insurance.

- [] If all or part of the property is located within a floodway, no development which would restrict the flow of water is permitted in the floodway. This includes structures, fill, and solid fences, among others. A site plan must be attached to this permit.
- [] For residential structures, the elevation of the lowest floor (including basement) shall be a minimum of _____ feet/MSL.
- [] For non-residential structures, the elevation of the lowest floor (including basement) or the elevation of flood proofing, shall be a minimum of _____ feet/MSL.
- [] For all structures, an elevation certificate signed by a Registered Land Surveyor or Professional Engineer must be provided to the County Floodplain Administrator. If the property is mortgaged, an elevation certificate will also be needed for insurance purposes.
- [] If a non-residential structure is floodproofed, a floodproofing certificate signed by a Registered Land Surveyor or Professional Engineer must be provided to the County Floodplain Administrator.
- [] The water supply for the development must minimize inflows of flood waters. (For instance, case water wells to above the flood elevation given above and install check valve on inlet.)
- [] The sanitary sewage system must minimize inflows of flood waters and outflows of sewage into flood waters. (For instance, install check valve on sewer outlet and place septic field lines well away from drainageways.)
- [] All service facilities (heating, cooling, etc.) should be elevated to above the given above elevation.
- [] Mobile homes must be securely anchored to resist flotation.
- [] Comply with Health Department regulations for sewage facilities in a floodplain.
- [] _____

Midland County Floodplain Administrator (or Assistant)

Your surveyor should return the completed elevation certificate to:

Department of Public Works
500 North Loraine
11th Floor
Midland, TX 79701
